

The Protector iControl

Internet Connected Sump Pump System

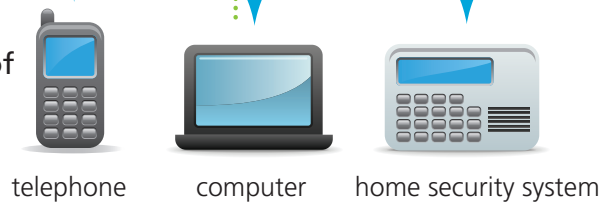

The incredible new iControl is an industry game changer. Combine the world's highest performance pump equipment with the latest microchip logic AND the power of the Internet and you have a flood prevention system that will actually prevent flooding! Let's face it, most uses for the Internet have certainly improved how efficiently or conveniently we live, but the iControl provides homeowners with CRUCIAL capabilities to protect their homes!

How it works...

1 iControl detects an alert condition and takes immediate flood prevention action.

2 iControl utilizes multiple methods of alert notifications.

3 iControl's online interface allows homeowner to monitor and manage the system anytime, from anywhere.
