

	The Protector iControl	The Protector DataPump	The Protector Classic	Watchdog BigDog (also ProSeries 2400)	Watchdog Emergency (also ProSeries 1000)
Features					
NOTIFICATION:					
Home Security System Connection	✓	✓	✓	O	O
Auto Dialer Connection	✓	✓	✓	O	O
"A-OK" Alerts	✓	-	-	-	-
Internet/Ethernet Connected!	✓	-	-	-	-
REMOTE ACCESS FROM ANYWHERE IN THE WORLD	✓	-	-	-	-
<p>What's the big deal about Remote Access? Imagine being on vacation (or simply at work) and you hear about big storms and power outages back home. Simply open your iControl Online Interface using any Internet connection. You now have full control as if you were standing in front of it (hence the name). You can check on remaining battery power, run pump tests, change system and notification settings, and more, anytime, from anywhere. No more racing home or calling neighbors. No more stress...</p>

Legend:

- ✓ feature is included
- ✓ Feature is included AND Industry leader, or Industry EXCLUSIVE
- O feature is available as an optional accessory
- L feature is limited in function, further explanation may be provided in notes below

Notes:

1. Pumping capacity testing is INDEPENDENTLY audited. The Watchdog and ProSeries brands significantly overstate their pumping capacities in print marketing and online. Basement Flood Protector, a company with the highest standards of integrity, is hiring star employees with pump industry experience.
2. Running time is also INDEPENDENTLY audited and stated this way so it represents a real world scenario. Some manufacturers like to make various qualifications to stating capacity in order to disguise their pump's poor performance and power conversion efficiency.
3. Watchdog's (and "ProSeries," their contractor brand) claimed capacities are among the most overstated in industry.
